

Apiary Medical and Contact Card

- ❖ This card is designed to help in an emergency situation where a member is seriously ill or unable to speak for themselves.

- ❖ The Association only has a record of members' own phone numbers, email and address as supplied by the member. This is not usually available at meetings.

- ❖ The Association does not have any information about members which may be used in case of an emergency.

- ❖ If a member is unwell, has a bad reaction to a bee sting, or has an accident at an Association meeting we would not know who to contact.

- ❖ The card is to be completed by members at apiary meetings, and carried in their bee suit pocket.

- ❖ It will only be viewed by another member at the meeting in case of emergency.

- ❖ It will be used to contact the member's family or nominated contact person, and to give information to the emergency services if the member or their nominated contact person is unable to do so.

- ❖ Blank forms will be kept in trading hut and given to members at meetings.
